SUBJECT: Silicon Wafer Requires No MSDS

To Whom It May Concern:

Thank you for your recent request for a Material Safety Data Sheet (MSDS) for SUMCO's silicon wafers.

The purpose of this letter is to advise you that silicon wafers do not require a Material Safety Data Sheet and, as such, SUMCO Phoenix Corporation does not provide one for this product. The United States governing body that oversees safety in the workplace, the U.S. Department of Labor's Occupational Health and Safety Administration (OSHA), has established a definition of an "article" for which an MSDS is neither required nor appropriate under the "Hazard Communication Standard." This definition is found in the United States Code of Federal Regulations, Title 29, Chapter XVII, Part 1910.1200(c). SUMCO's silicon wafers are formed to a specific end-use that is dependent on their shape and which under normal use conditions release no hazardous chemicals or pose a physical hazard or health risk.

Regards,

A handwritten signature in black ink, appearing to read 'G. Hedger', with a long horizontal line extending to the right.

Greg Hedger

Director, Environmental Health and Safety
